Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. Please refer to Important Risk Information. The principal value and return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance reflected at NAV does not include the Fund's maximum front-end sales load of 4.75%. Had it been included, the Fund's return would have been lower. You can obtain performance data current to the most recent month end by visiting www.calamos.com.

Unmanaged index returns, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index.

Average annual returns measure net investment income and capital gain or loss from portfolio investments as an annualized average, assuming reinvestment of income and capital gain distributions. In calculating net investment income, all applicable fees and expenses are deducted from the returns. Calendar year returns measure net investment income and capital gain or loss from portfolio investments for each period specified.

The fund also offers Class C shares, the performance of which may vary.

Class I shares are offered primarily for direct investment by investors through certain tax-exempt retirement plans and by institutional clients, provided such plans or clients have assets of at least \$1 million. For eligibility requirements and other available share classes see the prospectus and other Fund documents at www.calamos.com.

Portfolio performance, characteristics and volatility may differ from the benchmark(s) shown. Please refer to Important Risk Information.

Debt/capital ratio is a measure of a company's financial leverage, calculated as the company's debt divided by its total capital.

PEG ratio is a stock's price/earnings ratio divided by the estimated earnings growth rate in the next year; a lower PEG indicates that less is being paid for each unit of earnings growth.

Portfolio turnover is the percentage of assets in a portfolio that changed over a certain period, often a year; higher turnover indicates greater buying and selling activity.

ROIC (return on invested capital) measures how effectively a company uses the money invested in its operations, calculated as

a company's net income minus any dividends divided by the company's total capital.

The S&P 1500 Growth Index consists of the growth segment of the securities found in the S&P 1500 Index. The S&P 1500 combines the S&P 500, S&P MidCap 400 and the S&P SmallCap 600.

S&P 500 Index is generally considered representative of the US stock market.

Morningstar Large Growth Category funds invest primarily in big US companies that are projected to grow faster than other large-cap stocks. Stocks in the top 70% of the capitalization of the US equity market are defined as large cap. Growth is defined based on fast growth (high growth rates for earnings, sales, book value, and cash flow) and high valuations (high price ratios and low dividend yields). Most of these portfolios focus on companies in rapidly expanding industries.
