

Calamos Merger Arbitrage Fund

CALAMOS[®]
INVESTMENTS

OVERVIEW

To deliver absolute returns largely uncorrelated to equity and fixed income markets.

KEY FEATURES

- » Calamos is a pioneer in convertible and options investing, where analysis of public acquisitions and opportunities to alter risk reward through structure is an ingrained part of the investment process
- » Our merger strategy is a natural extension of our experience managing hedged equity and convertible arbitrage strategies for more than 20 years on average as a team
- » Because of this, we believe one of our main edges resides in public acquisitions where there are convertible bonds, liquid options or other securities within a target company's capital structure that allow us to alter risk reward through trade structure

PORTFOLIO FIT

Seeks to deliver absolute returns uncorrelated to equity and fixed income markets.

FUND TICKER SYMBOLS

A Shares	C Shares	I Shares
CMRAX	CMRCX	CMRGX

Absolute Return

Lower volatility, with opportunities for positive returns in most market cycles

Broad Diversifier

Typically lower correlations to both equities and bonds, which can help provide ballast against drawdowns

Strong Alternative

Complementary to other alternative strategies and can serve to complete a robust alternatives allocation

An event-driven strategy that invests in companies involved in potential merger deals

- Our strategy seeks to take advantage of dislocations between proposed deal price and where these companies are publicly trading before the deal is completed.
- May provide a lower volatility/lower correlation to equity markets with a positive return over long time horizons in most market environments.
- Because of uncertainty that an announced merger will be completed, the stock price of the company being acquired typically sells at a price below the announced acquisition price. This price difference is known as the completion risk premium.

Which factors influence the completion risk premium?

- Uncertainty that the deal will be completed
- Time frame of completion
- What the companies are valued at in a standalone scenario with no deal in place

Why Calamos?

- Our merger arbitrage strategy is managed by our arbitrage and volatility focused team that oversees our convertible arbitrage and hedged equity strategies.
- Because of this, we believe one of our main edges resides in public acquisitions where there are convertible bonds, liquid options or other securities within a target company's capital structure that allow us to alter risk reward through trade structure.
- When available, we focus on larger deals, especially when we think they are trading at wider spreads than is justified due to the constraint of merger arbitrage capital.

AVERAGE ANNUAL RETURNS (%)	1-YEAR	SINCE INCEPTION
Calamos Merger Arbitrage Fund		
I Shares - at NAV (Inception—9/29/23)	8.19	5.25
A Shares - at NAV (Inception—9/29/23)	7.89	4.99

Performance data quoted represents past performance, which is no guarantee of future results. Current performance may be lower or higher than the performance quoted. Please refer to Important Risk Information. The principal value and return of an investment will fluctuate so that your shares, when redeemed, may be worth more or less than their original cost. Performance reflected at NAV does not include the Fund's maximum front-end sales load of 2.75%. Had it been included, the Fund's return would have been lower. You can obtain performance data current to the most recent month end by visiting www.calamos.com.

Unmanaged index returns, unlike fund returns, do not reflect fees, expenses or sales charges. Investors cannot invest directly in an index.

Distribution Objective	Annual dividends; annual capital gains To deliver absolute returns largely uncorrelated to equity and fixed income markets.		

[†]As of prospectus dated 2/27/2026.

^{††}The Fund's investment advisor has contractually agreed to reimburse Fund expenses through March 1, 2027 to the extent necessary so that Total Annual Fund Operating Expenses of Class A shares, Class C shares and Class I shares are limited to 1.50%, 2.25% and 1.25% of average net assets, respectively. For purposes of these expense limitations, operating expenses do not include taxes, interest, short interest, short dividend expenses, brokerage commissions, acquired fund fees and expenses, foreign tax reclaim expenses, and extraordinary expenses (as determined in the discretion of Calamos Advisors LLC ("Calamos Advisors")), such as litigation costs. Calamos Advisors may recapture previously waived expense amounts within the same fiscal year for any day where the respective share class's expense ratio falls below the contractual expense limit up to the expense limit for that day. This undertaking is binding on Calamos Advisors and any of its successors and assigns. This agreement is not terminable by either party.

The ICE BofA 3-Month US Treasury Bill Index (G001) is an unmanaged index that measures the performance of a single US Treasury issue with approximately three months to final maturity. The issue is purchased at the beginning of each month and held for one full month. At the end of the month, that issue is sold and rolled into a newly selected issue.

S&P 500 Index is generally considered representative of the US stock market.

The Morningstar Event Driven Category is comprised of funds that attempt to profit when security prices change in response to certain corporate actions, such as bankruptcies, mergers and acquisitions, emergence from bankruptcy, shifts in corporate strategy, and other atypical events.
